

Confined Space

Course Duration : One day (Intensive)

Course aim:

The Confined Space Regulations 1997 requires that anyone who entered and/or works in a confined space must be trained and competent. This course is aimed at all workers who required to enter a confined space as part of their work. It provides delegates with the training which, when added to their experience, underpins the requirement of competence.

Course Overview:

This is a practicable based course that provides delegates with the practical knowledge and skills to carry out safe entry into a confined space and to deal with reasonably foreseeable

Course content:

- Overview of current legislation
- Definition of a confined space
- Confined space hazards and risks
- Safe system of work/permit to work
- Emergency planning/Communication
- Use of gas detection equipment
- Use of escape breathing apparatus
- Selection & use of PPE
- Health & Hygiene
- Practical exercise/assessment
- Written Test

This course has a practical entry assessment, using standard or company specific entry procedures, demonstration the correct use of all safety equipment required for safe entry.

On completion of this course a certificate of competence will be awarded to the successful delegates.
